

### **A line from Naomi Klein**

The water cycle is critical,  
unifies fragmented changes  
taking place in Europe's  
securities markets & school-

age child care not fully  
captured by the dictionary.  
We now live in a culture of  
caretaking whose dimensions

derive from a strong tendency  
to form neutral complexes.  
The strengths of Apache  
grandmothers assist by

facilitating the emergence  
of venture capitalists who  
risk their lives to fight fire  
if there's a profit in it.
